Assignment

Data Types in C++

(i)

```
#include <iostream>
Using namespace std;
int main( ) {
    Char ch = 'A';
    Cout << ch;
    return 0;
}
```

(ii)

```
#include <iostream>
Using namespace std;
int main( ) {
    Sting name = "Sabeen Fatima";
    Cout << name;
    return 0;
}
```

CamScanner

(iii)

```
#include <iostream>
Using namespace std;
int main( ) {
    double pi = 3.1415765;
    Cout << "value of pi" << pi;
    }
```

(iv)

```
#include <iostream>
Using namespace std;
int main {
    float balance = 1500.00;
    cout << "balance" << balance;
    }
```

(V)

```
#include <iostream>
Using namespace std;
int main {
    int age = 17;
    Cout << "my age is" << age;
    }
```
